PROFESSIONAL EXPERIENCE

QUANTZI INFOTECH

Chennai, India

Software Developer | June'25-Present

- Quantzi Webpage Developed the Quantzi company website using Next.js to create a modern, fast, and responsive web experience: <https://www.quantzi.co/>
- Avita Residency Developed a PG management admin panel webapp for Avita Residency using React.js. Built modules for KYC verification, staff management, booking management, mess tracking, expense and income monitoring. <https://avitaresidences.in/>
- Success Shipping Services Built a simple and responsive company website with CMS functionality for Success Shipping using React.js. Implemented page-wise content management features <https://www.successshipping.in/>
- BME Bazaar - Built a full-stack marketplace platform similar to OLX for used and refurbished medical equipment, featuring verified sellers, secure buyer access, listing approval systems, and admin moderation tools for user and product management. Tech stack: Next.js, Node.js, MongoDB: <https://www.bmebazaar.com/>

PLC TECHNOLOGY

Chennai, India

Associate Software Developer | Dec' 2023 - May '2025

- Kids Play Zone Management System Developed a web app using HTML, CSS, JavaScript, React, and MySQL to manage and securely store visitor details for a kids play zone with an easy-to-use staff interface.
- Restaurant Management System Built a web app using React, Node.js, CSS, and MySQL to help restaurant staff manage orders and tables, chefs track orders, and customers view the menu and make reservations.
- Learning Management Platform Developed a role-based learning platform with separate access for Admins and Learners. Admins could securely log in to upload, organize, and manage learning materials, while learners could register, access study resources, and complete assessments through a structured dashboard. Built using HTML, CSS, JavaScript, Node.js, Express.js, and MySQL.
